

Many species and wild hybrids vary in size between miniatures, intermediates and standards according to the clone in question and/or growing conditions. Consequently judges will compare entries selected from this list with typical miniatures from List A (miniature cultivars) and will regard as NAS any entries which they at their absolute discretion regard as being larger.

APPROVED INTERMEDIATES

Anna Panna	3Y-O	Lauren	2Y-GYR	Pretty Baby	3W-YO
Bantam	2Y-OOR	La Traviata	3Y-YYR	Reg Nicholl	2Y-YR
Brooke Ager	2W-P	Lemon Tree	3W-YYO	Rimski	2W-YWP
Chromite	2O-O	Little Alice	4Y-O	Rimster	2W-YWP
Coral Springs	2W-WWP	Little Dancer	1W-Y	Rogue	2W-Y
Dik Dik	2Y-R	Little Dorr	4W-W	Rose of May	4W-W
Dinkie	3Y-GYR	Little Tyke	1Y-Y	Scarlet Tanager	2Y-R
Eastbrook Beauty	2Y-O	Magic Step	2W-P	Sidley	3W-GYY
Elfin Dell	2W-P	Matrix	2Y-P	Signorina	2W-GYP
Elfin Moon	2W-W	My Sweetheart	3W-YYR	Skilliwidden	2Y-Y
Eoster	3W-YO	Olive Branch	3W-GGY	Sweetie Pie	3W-GYY
Frou Frou	4W-W	Pencrebar	4Y-Y	Sylph	1Y-Y
Grace Note	3W-GGY	Pentire	11Y-R	Topolino	1W-Y
Grey Lady	3W-WWP	Perfect	2Y-Y		

The above lists of Approved Miniature and Intermediate cultivars should be used for exhibition from 2011.

Any proposed additions to or deletions from these lists should be sent in writing to the Chairman of the Classification Sub-Committee c/o The Daffodil Society Secretary.

The criteria used by the Classification Sub-Committee in assessing whether cultivars are suitable for inclusion on the above lists are as follows:

MINIATURES – Under normal growing conditions single headed flowers must not exceed 50mm in diameter. For multi headed varieties the overall size of the inflorescence and the height and thickness of the stem should be of miniature stature. For example while the individual florets of ‘Avalanche’ or ‘Paperwhite’ are usually less than 50mm in diameter the overall size of the bloom is clearly not of miniature proportions.

INTERMEDIATES – These are cultivars from Divisions 1 to 4 and 11 which under normal growing conditions produce flowers which are greater than 50mm but do not exceed 80mm in diameter.

APPROVED MINIATURES

Section A – Cultivars from divisions 1 to 12

Adorable Lass	6Y-Y	Hawera	5Y-Y	Opening Bid	6Y-Y
Alec Gray	1W-W	Heidi	6Y-Y	Orclus	10W-W

<i>triandrus</i>	subsp. <i>pallidulus</i>		Ganymedes
× <i>tuckeri</i>			Intersectional Hybrid
<i>viridiflorus</i>			Jonquilla
<i>wilkommii</i>			Jonquilla

Note to exhibitors and judges

A shorter list could have been produced if only sub-species (subsp.) had been included and not varieties (var.). However if in a class calling for six distinct miniatures both varieties *nivalis* and *graellsii* of *bulbocodium* subsp. *bulbocodium* were shown judges would then be unsure whether or not the exhibit was to schedule. Species are very variable and varietal names have been given to specimens which can be found in the normal spread of flowers within a species or sub-species population. When two such varieties are shown within the same collection then the judge will take this into account as he/she would when assessing a collection of standard cultivars for range of division and colour combinations.
